

*The future of the lynx
and of hunting
also depends
on **YOU***

with lynx without lynx

When a
lynx
dies,
you
lose
too

A good hunter...

Loves, knows and respects nature

A good hunter...

Feels proud to share his hunting ground with other great hunters such as the Iberian lynx

A good hunter...

Knows that the lynx is not his enemy but an ally in fox control

A good hunter...

Checks before pulling the trigger

If you love hunting, check before you shoot

Respect hunting seasons, boundaries and reserve areas

Report the use of mass and indiscriminate hunting methods

Choose the method of hunting that is least dangerous to the lynx and only hunt rabbit when the population is high

If a lynx enters the area when hunting partridge with decoys, frighten it away responsibly
